HYPER STAKING

OVERTHEMOON TOKEN

HYPER STAKING

Introduction:

This is just a glimpse of the second phase of the project, OverTheMoon is embarking on a mission to elevate these benefits to new heights and honor the loyalty of its users.

Through a visionary blend of hyper staking, vesting, and a robust buyback model, OverTheMoon Token unveils a universe of possibilities, where every action contributes to the expansion and stability of the ecosystem.

Discover how staking OVMON not only boost and multiply the rewards from reward distribution, liquidity and auto burn taxes but also propels you towards greater returns within the OverTheMoon ecosystem.

OVERTHEMOON TOKEN

HYPER STAKING

1. Hyper Staking Rewards:

- OVMOON and wOVMOON tokens can be staked within the OverTheMoon protocol to earn more rewards.
- The reward share is determined by the total sum of staked OVMOON and wOVMOON, incentivizing users to actively participate in the ecosystem.
- Staking OVMOON and wOVMOON contributes to the token's liquidity and stability, fostering a vibrant and sustainable community.

2. OVMOON:

- OVMOON serves as the native token for the OverTheMoon protocol and ecosystem.
- Holders of OVMOON can earn rewards by simple holding or they can maximize and multiply rewards by staking their tokens providing liquidity, obtaining and vesting wOVMOON.
- Staking OVMOON allows users to maximize and multiply rewards while contributing to the liquidity and stability of the token.

3. wOVMOON (escrowed OVMOON):

- wOVMOON is a vesting token for OVMOON, providing users with additional flexibility in their participation.
- It can be staked to earn rewards similar to staking OVMOON or staked into a vesting contract to claim an equivalent amount of unlocked OVMOON over a 1-month linear vesting period.

Hyper Staking

4. Staking and Vesting \$wOVMOON:

- Users can deposit wOVMOON into a vesting contract to claim the equivalent amount of unlocked OVMOON over a 1-month (30 days) linear vesting period.
- This mechanism provides users with a method to gradually unlock their tokens while still contributing to the ecosystem's stability.

OVMOON Buyback Model:

- OverTheMoon employs a buyback model to maintain a stable OVMOON and deflationary supply.
- A portion of the funds raised will be used to repurchase OVMOON from supported exchanges.
- The bought-back OVMOON will be held in a dedicated reserve wallet and utilized to supply rewards in wOVMOON to OVMOON and wOVMOON stakers, enhance liquidity, and potentially reduce the total supply through token burn mechanisms.

Conclusion:

The 2nd Phase of OverTheMoon Token protocol represents a novel approach to enhancing value in the cryptocurrency space. By combining innovative features such as hyper staking rewards, vesting mechanisms, and a robust buyback model, OverTheMoon Token not only incentivizes community engagement and participation but also ensures the long-term sustainability and growth of the ecosystem.

As the project continues to evolve, it remains committed to fostering a vibrant and inclusive community while delivering value to its stakeholders.
